Rating: 4/5 The apps performance is fine, i just find it annoying that it takes so long to even be created. The program has no option for making it faster. On my system i have 512mb of ram and a 1.8ghz processor. I have tried to disable all of my ad-blockers but this does not help. The window takes a long time to open, and the animations are really slow, even more so than in pre-release builds.

### What's New in the?

Within this package you will find the latest version of the Gmail Notifier Pro, a free program for adding multiple email accounts with the support of the most used email service providers: AOL, Google, Hotmail and Yahoo! Mail. It lets you set up account notifications on Yahoo! mail, and on Google, Facebook, Twitter, Google+, LinkedIn and more. Moreover, Gmail Notifier Pro will let you manage your mail easily and efficiently, and serve as a full solution for all your needs. Indeed, the program not only monitors your Google (Gmail, GMail Apps, Google Talk) and Yahoo! (Yahoo! Mail, AIM, MSN) accounts, but also lets you read your email on the web browser: Facebook, Twitter, Google+, LinkedIn, MySpace, Livejournal, etc. On top of that, Gmail Notifier Pro allows you to select and add multiple folders (such as Inbox, Sent Items, Drafts, Starred, Junk, etc.) and to send/receive email directly to these folders. Furthermore, you can set up custom signatures and click to create a custom action, tweak your global settings, schedule tasks, use Google Calendar, create RSS feeds, set up proxy server, and so on. Requirements: File size: 1.13 MB Portable mode (i.e. works without installation, requires a portable installation) Gmail Notifier Pro 1.1.2.7 (Portable) Introducing Gmail Notifier Pro. If you already use Gmail and wish to be notified about all your incoming mail as soon as it arrives, this is the best solution. Gmail Notifier Pro is a lightweight Windows utility that integrates your Google account into a simple application launcher. Once installed, it will notify you when new messages arrive. As it downloads and analyzes your mail using the Web Services API, you can remain completely unobstructed during that process. After that, you can quickly launch your favorite web browser and check your new messages directly from your taskbar. To view the complete list of new messages for the past 24 hours, choose a date range, specify the number of new items to display, then click the "Refresh all" button. If you want to keep the most important email or something that came from a particular address in your inbox, simply add that address to your favorite folders. Note: Gmail Notifier Pro only works with the Google Web Services API and does not use any Google Account
